+44 794 615 2211

I'm a senior UX/UI designer who's helped reputable brands and companies solving complex design problems and improving on the experience they provide to their customers.

I help gather business and user requirements, research using available insights and analytics, test hypothesis and translate requirements into testable prototypes, design visually aesthetic user interfaces and convert them into responsive and interactive web apps using modern Javascript frameworks and libraries.

Skills

Management

- Project planning & management
- Communication & collaboration
- Design & Ideation workshops
- Mentorship & team training

User Experience (UX)

- Insights analysis
- User research
- Usability testing
- Experience mapping
- Information architecture
- User flows / journeys
- Wireframing & Prototyping

User Interface (UI)

- Visual design
- Design systems
- Design principles
- Layout and composition
- Brand refresh
- Accessibility

Front End Development

- HTML / CSS / JS
- Figma Plugin/Widgets dev
- Version control
- Unit test
- Build and deploy

- **Superdrug**
Senior Front-end Developer / UI Designer (Jul 2012 - Jul 2014)
- **Coral**
Visual Designer (May 2012 - Jun 2012)
- **Kaplan International**
UI Designer/Developer (Aug 2010 - Apr 2012)

Flash Designer (Feb 2010 - Apr 2010)

Education

- **Masters (New Media Art & Design)**
2009 • University of West London
- **Certification in Design and Multimedia**
2003 • Peak Solutions (Pvt) Ltd
- **Bachelors (Computer Sciences)**
2002 • University of central Punjab, Lahore

Tools

Figma specialist

Figma is a powerful tool for team organisation, project lifecycle and design management.

With a commanding expertise in this tool, im able to manage projects in teams and create well structured, scalable and modular layouts/designs easily and quickly, leveraging features like auto layout, interactive variants, component props, prototyping, branching and custom coded plugins which makes the workflow smooth, fast and efficient.

UX

Figma • Miro • Pen/Paper • Whiteboard • Axure • UX Pin • Userzoom

UI

Figma • Sketch • Adobe XD • Illustrator • Photoshop • Invision • Zeplin

Dev

React • Redux • Storybook.js • Sass • Tailwind • Typescript • Git • Webpack • NPM

My Design Process

Working in cross-functional Agile teams has taught me that the best innovative ideas are born in collaborative teams and a set process plays a pivotal role in generating, testing and executing these ideas. Each project demands a tweaked set of steps and actions in the process but in the majority of tasks, I try to run a process within the team similar to this flow.
